

Nursing Chair/Beds

PRINCESS BED

Designed primarily for the nursing industry, these chair/beds allow users to be seated for long periods without the pain and discomfort associated with long term nursing. Adjustable positions including seated, reclining and sleeping, plus all positions in-between. The Princess chair/bed also offers the Air Comfort patented seating system, flow through seating, pressure relief, adjustable seat with infinite locking, adjustable legrests, adjustable back and lockable castor wheels. Optional extras include footrests, lap trays, side covers, incontinence cover and lap belt. Best suited to smaller framed users and offering unrivalled comfort and support.

Product Code: MC-Princess bed

TILT BED

Larger pressure relief chair/bed suitable for patients up to 6' 2" (188cm). Light in weight and easy to manoeuvre it offers adjustable positions including seated, reclining and sleeping, plus all positions in-between. Infinite locking gas springs allow minute changes to seating/sleeping positions, whilst three gas springs make positional changes to the back, seat and legrest easier for the carer. The Tilt chair/bed also offers the Air Comfort patented seating system, flow through seating, pressure relief, adjustable seat with infinite locking, adjustable legrests, adjustable back and lockable castor wheels.

Product Code: MC-tiltbed

DELUXE BED

The most flexible of the chair/beds, offering four optional wing positions, the Deluxe chair/beds can be closed for slimmer patients, open for larger patients, removed for patients requiring fully outstretched limbs or down for side transfers.

The Sure- Chek Fusion material on the seating surface is incredibly soft, waterproof, resistant to bacteria and fire retardant. The Deluxe chair/beds are available in two sizes, standard or small, and the lockable castor wheels ensure they are easy to manoeuvre.

EVOLUTION DAY BED

This chair uses the latest technology in pressure management materials. The foams are a visco elastic foam designed to distribute pressure over a large area while allowing the natural alignment of the spine. The high grade visco elastic foams give the end user excellent pressure relieving qualities without compromising postural support. The cover is a new carrflex material designed to give 4-way stretch to reduce shearing. The Evolution chair has been designed as a low maintenance, user friendly chair with a large range of adjustable seating positions to suit almost any user.
